

ANNOUNCEMENT - 7th of October 2015

Drawboard PDF preinstalled on Surface Pro 4 and Surface Book.

On 6th of October 2015, Microsoft released its two newest devices for industry professionals – the Surface Pro 4 and the Surface Book.

Drawboard PDF, a popular PDF annotator for Windows 10 devices and particularly for architecture, engineering and construction (AEC) users, will come preinstalled on every Surface Pro 4 and Surface Book device shipped worldwide. This partnership empowers Surface users worldwide as they move to digital paper.

A focus on the AEC industries remains at the core of Drawboard's development efforts.

Drawboard PDF, which will also continue to be preinstalled on Surface 3 devices, has undergone a significant user interface overhaul in recent months. This overhaul brings the application closer towards a seamless Windows 10 experience, and together with Surface preinstallations, Drawboard is proud to continue enabling easy drawing and document markup on Windows devices.
